Underwriter Laboratories (UL) becomes Associate Member of Eurovent Middle East

Organisations announce cooperation in the fields of safety and Indoor Air Quality (IAQ)

Dubai, 22 May 2019. UL and Eurovent Middle East have announced their cooperation in the region to work towards higher safety standards in relation to HVAC equipment and installations. Both organisations also will form a joint working group to develop initiatives for improved Indoor Air Quality. To underline this cooperation, UL takes an Associate Membership with Eurovent Middle East.

As a global company with 125 years of expertise, UL is recognised worldwide for its testing standards and programs. UL brings clarity and empowers trust to support the responsible development, production, marketing and purchase of goods, solutions and innovations of today and tomorrow. It enables safer, more secure, more sustainable products, services, experiences and environments – leading to smarter choices and better lives.

Nils Meinhardt, Global Business Development Manager HVAC, UL, stated: “UL and Eurovent Middle East have the same intentions and targets: improving standards and quality in the region and support the development of a sustainable environment for the countries and its people in the Middle East. Joining forces enables us to use synergies and double our efforts in raising awareness on issues like safety and IAQ.”

Markus Lattner, Managing Director of Eurovent Middle East, added: “UL has a strong reputation in fire and electrical safety, but is active in many more areas as well. The cooperation of our organisations in areas like Indoor Air Quality will give joint recommendations great credibility. It will help us to contribute to a better living environment in the Middle East. This is what both our organisations ultimately stand for and we are happy to join our efforts to reach this target.”

Eurovent Middle East is the region's only industry association representing leading manufacturers of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, Industrial Ventilation, and Building Automation Technologies, as well as sector associations and industry initiatives active in these fields. By thinking 'Beyond HVAC', contributing manufacturers fulfil highest requirements in terms of product quality and sustainability. For more information, visit www.eurovent.me.
