Eurovent Association releases new air filter guidebook

The first edition provides for a hands-on introduction to air filters for general ventilation

Brussels, 3 April 2017. The Product Group 'Air Filters' within the Eurovent Association has released the first edition of its guidebook 'Air Filters for General Ventilation'. On 28 pages, the document provides for a hands-on introduction to all important aspects related to air filters. It constitutes the first of many measures within Eurovent's upcoming #IAQmatters awareness raising campaign.

The guidebook 'Air Filters for General Ventilation' briefs air handling equipment manufacturers and end-users on correct air filtration. It covers topics such as:

- The importance of filtration,
- Benefits of using air filters,
- Fundamentals of air filtration,
- Standards in place,
- Correct filter design,
- Energy efficiency of air filters,
- Key applications for air filters,
- Correct assembling, maintenance and disposal of used filters.

Specific attention is given to the new global ISO16890 air filter standard as well as the importance of air filters in ensuring a healthy indoor climate.

'Our industry talks a lot about Indoor Air Quality these days. Yet, often without offering any practical solutions. At the Eurovent Association, we have been working on changing this for many years by developing guidelines and standards throughout all ventilation areas.' States Chris Howarth (Jasun Envirocare Plc, United Kingdom), member of the Eurovent Product Group 'Air Filters' and Lead Editor of the new guidebook. 'With air filters constituting a key factor in ensuring a better indoor air quality, the aim of our new guidebook is to provide users of our products with hands-on information to receive a better understanding of air filtration and what is behind this seemingly simple product.'

The Eurovent Product Group 'Air Filters' is the largest grouping of air filter manufacturers worldwide, and home to more than 30 manufactures. The Guidebook 'Air Filters for General Ventilation' is available free-of-charge on www.eurovent.eu. It is also part of Eurovent's upcoming #IAQmatters campaign, which is an evolving, open-source platform offering practical advice on issues related to Indoor Air Quality.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate, Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

Eurovent's roots date back to 1958. Over the years, the Brussels-based organisation has become a well-respected and known stakeholder that builds bridges between manufacturers it represents, associations, legislators and standardisation bodies on a national, regional and international level. While Eurovent strongly supports energy-efficient and sustainable technologies, it advocates a holistic approach that also integrates health, life and work quality as well as safety aspects. Eurovent holds in-depth relations with partner associations around the globe. It is a founding member of the ICARHMA network, supporter of REHVA, and contributor to various EU and UN initiatives.

Our Members and 'Affiliated Manufacturers'

Our Members are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate, Process Cooling, and Food Cold Chain technologies.

The more than 1000 companies within their networks (Eurovent 'Affiliated Manufacturers') can directly participate in Eurovent activities in a democratic and transparent manner.

Member types

MEMBER TYPES

- 

MEMBERS (NATIONAL ASSOCIATIONS)
Leading national sector associations from Europe representing manufacturers in the area of Indoor Climate (HVAC), Process Cooling, and Food Cold Chain technologies.
- 

AFFILIATED MANUFACTURERS
More than 1.000 manufacturers that are part of Eurovent through the respective national association, and directly participate in Eurovent activities.
- 

CORRESPONDING MEMBERS
Manufacturers from Europe, the Middle East and Africa, which do not yet have a national association representing Indoor Climate (HVAC), Process Cooling, and Food Cold Chain technologies.
- 

ASSOCIATE MEMBERS
Organisations that are engaged in activities related to sectors covered by the association, such as associations of engineers and consultants, exhibition organisers, laboratories, and universities.

Democratic decision-making

DEMOCRATIC DECISION-MAKING

- 

Activities rest upon democratic decision-making procedures between members and their representatives
- 

'Umbrella association' structure ensures broad and truly credible representation of our industry vis-à-vis policy makers
- 

Voting rights independent from amount of membership contributions or company sizes
