robatherm joins Eurovent Middle East

Premium Air Handling Unit manufacturer is latest addition to the association's base of members

Dubai, 01 March 2022. robatherm, a German manufacturer specialised in the production of customised Air Handling Units, has joined the association with a commitment to joint industry initiatives in the fields of energy efficiency and Indoor Air Quality. With its recently opened office in Dubai, robatherm has underlined the strategic importance of the Middle East for its future growth.

The company has production facilities in Germany and Thailand, serving high-end customers around the globe with high-technology Air Handling Units. Among its prestigious projects in the region, Terminal 2 of the Kuwait International Airport - expected to be opening soon - has been of specific significance. For this project, robatherm provided 225 Air Handling Units and close to 15.000 Air Filters which deliver impressive 15 million cubic meters of clean air per hour.

Benjamin Gorge, Sales Director Middle East at robatherm DMCC explained the motivation to join: "Recently, we all learned that safe and clean indoor air is essential to our wellbeing. Thanks to our personal experiences with sensitive air requirements within hygienic and cleanroom applications, robatherm was able to adapt to the changing needs and expectations of the industry and end consumers. We are excited to join Eurovent Middle East and actively contribute to raising awareness and shape the region's regulatory framework".

Markus Lattner, Managing Director of Eurovent Middle East adds: "We are very happy to welcome robatherm to our association. The past two years have shown us how important our work towards better standards and quality levels is. We expect an increase on regulatory developments in the ventilation sector, which is long overdue. Thus, we greatly appreciate the support of robatherm for our future activities."

About Eurovent Middle East

Eurovent Middle East is the region's only industry association for Energy Efficiency, Indoor Air Quality and Cold Chain Solutions. Its participants constitute leading manufacturers of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, Industrial Ventilation, and Building Automation Technologies, as well as sector associations and industry initiatives active in these fields. By thinking 'Beyond HVACR', contributing manufacturers fulfil the highest requirements in terms of product quality and sustainability.
