# HVACR Next Generation

SUSTAINABILITY IN EXTREME CONDITIONS

29 April 2025  
09:00-18:00h

InterContinental Durrat  
Al Riyadh Resort & Spa

## Event Outline

Sustainability, energy efficiency, the pending refrigerant transition as well as Indoor Air Quality (IAQ) are among the most pressing issues of our times. In view of rising temperatures in a region which already faces extreme environmental conditions, the HVACR industry stands front and centre in the fight to reduce greenhouse gas emissions while providing affordable and resilient ventilation, cooling, and refrigeration solutions for the benefit of all. In close cooperation with regulatory bodies in the region, Eurovent Middle East and AMCA work to enhance technical regulations and minimum energy performance requirements across a wide array of products and technologies.

Regular exchange among the industry, and between industry and government is key to driving awareness and understanding for the needs and challenges, but also for the opportunities arising from the latest technical advancements. The second 'HVACR Next Generation' congress will gather high level representatives from Government, Industry, and other Stakeholders to discuss and showcase the latest developments set to shape a sustainable pathway into the future of cooling.

## Key Topics

While the morning session will feature a succession of keynotes and panel discussions, the afternoon session will focus on industry solutions, showcasing next generation technologies and case studies on energy efficient and sustainable projects.

- Refrigerant Transition in High Ambient Temperature (HAT) countries
- Sustainability as business case - Total Cost of Ownership (TCO)
- Energy Efficiency & IAQ
- Next Generation Technology
- Sustainability case studies

## Target Audience

Government, Building and HVACR Industry Executives, Investors, Developers, Planners, Consultants, Academia

## Disclaimer

As not-for-profit organisations, Eurovent Middle East and AMCA take no commercial interest in the organisation of this event.

- All contributions and presentations are selected based on their relevance only;
- Sponsorships are necessary to finance the organisation of the event, but do not entitle a sponsor to present commercial content other than relevant case studies;
- Complimentary attendance will be limited to industry professionals on executive levels and representatives from governmental institutions by invitation only. All other attendees will be subject to a nominal registration fee to reduce no-shows and cover additional delegate costs.

## Call for support and engagement

Eurovent Middle East and AMCA invite all relevant stakeholders to join, support, engage, and contribute to this event. For any inquiries, please reach out to the organising team at [office@eurovent.me](mailto:office@eurovent.me)

## Registration

To register for the event, please visit [www.eurovent.me/congress](http://www.eurovent.me/congress)

## The Venue

Grand Ballroom, InterContinental Durrat Al Riyadh Resort & Spa

## Organisers

---

Eurovent Middle East is the region's industry association representing leading manufacturers of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, Industrial Ventilation, and Building Automation Technologies, as well as sector associations and industry initiatives active in these fields. By thinking 'Beyond HVACR', contributing manufacturers fulfil the highest requirements in terms of product quality and sustainability. As a not-for-profit organisation, it supports the development of regulatory frameworks, and strives to educate the market on products, technologies, standards, and best practices.

Air Movement and Control Association (AMCA) International Inc. is a not-for-profit association of manufacturers of fans, dampers, louvers, air curtains, and other air-system components for commercial HVAC, industrial-process, and power-generation applications. With programs such as certified ratings, laboratory accreditation, verification of compliance, and international-standards development, its mission is to advance the knowledge, growth, and integrity of the air movement and control industry.
