Industry Networks (BNC) most recent addition to Eurovent Middle East

Associate member provides expertise through exceptional project intelligence

Dubai, 9 February 2020. Established as a start-up in 2003, Industry Networks is a technology company that created the BNC Network, the largest project intelligence service in the MENA region. BNC intelligence covers the Urban, Utilities, Oil & Gas, Industrial and Transport sectors. The company's flagship product, "IBIS AIR" is an Integrated Business Intelligence System used by more than 15,000 construction professionals. Based on its massive construction intelligence database, Industry Networks publishes over 1,500 construction reports annually and a powerful monthly Projects Journal to provide the real story of GCC construction as it happens.

Industry Networks has been relentless in the pursuit of finding creative ways to link entities across the construction industry, placing emphasis on the necessity for transparency and efficiency as an integral part of project reporting and intelligence. With the current downturn in the building industry, it has become critical to report on projects in an accurate and efficient way which supports all stakeholders in the industry in an effective way.

Managing Director of Eurovent Middle East, Mr Markus Lattner, shares some insight on the value of having Industry Networks onboard as an Associate member, "We are extremely happy that Industry Networks is joining our group. When they first introduced us to their information system for building projects, we were immediately amazed by the extent of their coverage and the usability of their product. Having them as a knowledge partner with us in our quest to bring the industry together is a tremendous advantage."

Mr Avin Gidwani, CEO, Industry Networks further re-iterates, "Eurovent Middle East is the premiere industry association for driving standards within the HVAC industry and we are excited about working closely with them to create a digital industry network for the systematic exchange of information between consultants, contractors and suppliers as this furthers our shared goal of providing greater market transparency and driving positive transformation across the construction industry in the region."

Eurovent Middle East is the region's industry association for Energy Efficiency, Indoor Air Quality and Cold Chain Solutions. Its participants constitute leading manufacturers of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, Industrial Ventilation, and Building Automation Technologies, as well as sector associations and industry initiatives active in these fields. By thinking 'Beyond HVACR', contributing manufacturers fulfil the highest requirements in terms of product quality and sustainability. For more information, visit www.eurovent.me.
